PRODUCT LAUNCH

Palo Alto Networks

2026-05-25

### Palo Alto Networks Expands Cortex XSIAM with Agentless Runtime Workload Protection and AI-Driven SOC Automation

Palo Alto Networks expanded Cortex XSIAM with agentless runtime workload protection, graph-based attack surface management, and AI-driven SOC automation. The updates eliminate friction of agent-based cloud security deployment while deepening detection, enabling automated threat correlation, incident summaries, and containment guidance. The shift targets alert fatigue and accelerates cloud response by removing the human-triage bottleneck, providing a unified, agentless, scalable cloud defense architecture.

PRODUCT LAUNCH

Fortinet

2026-05-25

### Fortinet Introduces FortiOS 8.0 with Secure AI Controls, Fabric-Based AI Agents, Flexible SASE, and Simplified SD-WAN

At Fortinet Accelerate 2026, Fortinet announced FortiOS 8.0, expanding Secure Networking with AI-driven security controls, fabric-based AI agents, enhanced SASE capabilities, and simplified SD-WAN. The release also incorporates quantum-safe features and aims to streamline security architectures while delivering consistent protection and performance across hybrid and digital infrastructures.

## Fortinet Expands NVIDIA Integration to Deliver Scalable Enterprise AI Security via FortiAI Gate

Fortinet announced an expanded NVIDIA integration to accelerate FortiAI Gate for scalable enterprise AI security. The joint solution combines Fortinet's AI-driven Security Fabric with NVIDIA's AI platforms to protect AI workloads, data, and autonomous agents in real time across data centers and cloud. It enables zero-trust AI environments, real-time governance, data sovereignty support, and low-latency inline deployment, helping organizations monitor AI usage and stop malicious prompts and data exfiltration while preserving performance.

**ANNOUNCEMENT****Cisco**

2026-05-25

## Cisco Refines Its Risk-Based Vulnerability Disclosure for the AI Era

Cisco detailed refinements to its vulnerability disclosure approach for the AI era, adopting a risk-based model that prioritizes issues under active exploitation or with high attack likelihood. AI models accelerate vulnerability discovery and remediation. Lower-risk findings may be disclosed only as high-level release info tied to patched versions, while detailed advisories remain for critical or actively exploited issues. Third-party and open-source vulnerability handling remains unchanged.

**ANNOUNCEMENT****CrowdStrike**

2026-05-25

## CrowdStrike Named Leader and Fast Mover in 2026 GigaOm Radar for Identity Threat Detection and Response

CrowdStrike was named the Leader and Fast Mover in the 2026 GigaOm Radar Report for Identity Threat Detection and Response (ITDR). The company is positioned in the Leader quadrant for platform-based identity security, highlighting Falcon Next-Gen Identity Security as the identity control plane for agentic enterprises. The release emphasizes eliminating standing privileges and providing continuous, risk-aware protection across endpoints, browsers, and cloud environments.

**PARTNERSHIP****Zscaler**

2026-05-25

## Zscaler Launches Project AI-Guardian with Global System Integrators to Accelerate Enterprise AI Adoption

Zscaler launched Project AI-Guardian, an expanded collaboration with Global System Integrators including Cognizant, EY, HCLTech, Infosys, TCS, and Wipro. The program combines Zscaler's Zero Trust Everywhere platform with GSI consulting expertise to help enterprises accelerate AI initiatives while maintaining security, visibility, and compliance. It also introduces a Security Review and Resiliency Engagement Program providing immediate threat visibility, threat modeling, and defenses against AI-driven vulnerabilities across endpoints, SaaS, cloud, and code repositories.

**RESEARCH****Check Point Software**

2026-05-25

## Check Point Research: 25th May Threat Intelligence Report

Check Point Research published its weekly Threat Intelligence Report highlighting the March–April 2026 AI Threat Landscape, with AI-driven attacks now routine in cybercrime, including a campaign that compromised nine Mexican government agencies via over 5,000 automated commands. The bulletin also covers Nimbus Manticore (IRGC-linked) operations resurfacing during Operation Epic Fury with SEO poisoning, career-themed phishing, and the new MiniFast backdoor, plus a 124% surge in hacktivism and ransomware across DACH led by Akira, Qilin, and Safepay.

**ANNOUNCEMENT****Cloudflare**

2026-05-25

## Cloudflare CEO: Workforce Cuts Will Deliver Growth in the Agentic AI Era

Cloudflare announced it is reshaping its workforce to prioritize growth and value creation in the era of agentic AI. CEO Matthew Prince and COO Michelle Zatlyn framed the cuts not as cost-cutting but as a strategic move to redefine how a high-growth company operates. Cloudflare will retain and hire roles seen as core to growth—primarily engineers (builders) and sellers—while reducing roles elsewhere, signaling a focus on revenue generation and product development over internal oversight functions.

## AWS Weekly Roundup: Local Zones in Istanbul, Open-Source ExtendDB, Kiro Web, and More

AWS announced new launches: AWS Local Zones in Istanbul, Türkiye providing compute, storage, and networking with in-country data residency and single-digit-ms latency for latency-sensitive workloads; open-source ExtendDB, a DynamoDB-compatible adapter suited to local development and testing; and Kiro Web, a browser-based interface for AWS's AI-powered development environment offering spec-driven development, AI chat, and agent capabilities. The post also notes upcoming removal of Bitnami images from ECR Public with migration guidance.

## AWS Interconnect: Managed Multicloud and Last-Mile Connectivity Generally Available

AWS announced general availability of two new managed services: AWS Interconnect – Multicloud, providing private Layer 3 connectivity between Amazon VPCs and other clouds (Google Cloud at launch, with Azure and OCI later in 2026); and AWS Interconnect – Last Mile, automating provisioning of redundant connections and BGP routing between on-premises sites and AWS with bandwidth from 1 Gbps to 100 Gbps and a 99.99% availability SLA. The services reduce engineering overhead by eliminating manual VPNs and third-party network fabrics.

2026-05-25

## AWS Launches Sustainability Console for Cloud Carbon Footprint Transparency

AWS launched the AWS Sustainability Console, a standalone service centralizing sustainability reporting to help customers measure, understand, and reduce the environmental footprint of cloud workloads. Built on the Customer Carbon Footprint Tool with enhanced features and easier access, it is available immediately at no extra cost, with historical emissions data from January 2022. The legacy CCFT will be retired on June 30, 2026, with migration guidance provided, and access no longer requires billing console permissions.

**PRODUCT LAUNCH****Pillar Security**

2026-05-25

## Pillar Security Launches RedGraph: Attack Surface Mapping and Continuous Testing for AI Agents

Pillar Security announced RedGraph, billed as the first attack surface mapping and continuous testing platform purpose-built for AI agents. The release marks a milestone in secure AI software development, aligning with Pillar's mission to help organizations build and run secure AI systems by combining attack surface visibility with ongoing adversarial testing across agentic workflows.

**BLOG****Fastly**

2026-05-25

## Multi-CDN Architectures Are Gaining Traction in Australia and Beyond

Fastly Senior Enterprise Architect Kay Sawada authored a guest opinion piece explaining why enterprises are increasingly adopting multi-CDN architectures to boost resilience, availability, and quality of experience. The article details how routing traffic across multiple CDNs mitigates outages, regional bottlenecks, and single-vendor risk, with DNS-based traffic steering and Layer 7 management to dynamically allocate traffic. Fastly emphasizes the need for orchestration platforms and partnership strategies to support multi-CDN designs effectively across Australia and global markets.

**PRODUCT LAUNCH****A10 Networks**

2026-05-25

## A10 Networks Launches Integrated AI and Security Solutions for Healthcare and Beyond

A10 Networks announced an integrated AI and security platform combining an upcoming AI-ready ACOS stack to interface with AI inference and GenAI environments, plus A10 Control, a centralized management console unifying Thunder ADC and Defend product orchestration. The expanded A10 Defend portfolio adds AI-powered bot protection alongside enhanced DDoS mitigation for large volumetric and multi-vector attacks, including cloud-based protection. CEO Dhrupad Trivedi emphasized innovation to meet AI-powered infrastructure needs across healthcare and enterprise customers.
