PARTNERSHIP

Palo Alto Networks

2026-06-10

Palo Alto Networks & Deutsche Telekom Launch 'Sovereign Cortex with T Security' for Europe

Palo Alto Networks and Deutsche Telekom launched 'Sovereign Cortex with T Security,' a joint AI-driven security service bringing Cortex SecOps to Europe's regulated industries with verifiable data-sovereignty controls. Deutsche Telekom acts as the independent European trust partner, managing encryption keys, telemetry, and audited access logs while aligning with NIS2, DORA, and KRITIS. Targeted sectors include healthcare, financial services, public sector, and critical national infrastructure, with initial availability expected in Q3 2026.

PRODUCT LAUNCH**Fortinet**

2026-06-10

Fortinet Launches FortiGate 3500G and 400G Next-Gen Firewalls for AI Workloads

Fortinet unveiled the FortiGate 3500G and 400G next-generation firewalls, targeting data centers and large enterprises handling AI-driven workloads and heavy encrypted traffic. The new appliances combine ASIC acceleration, AI-powered threat intelligence, and improved encrypted-traffic inspection to scale security across hybrid networks. The launch expands Fortinet's high-end firewall portfolio and underscores its push toward AI-oriented, data-center-scale deployments.

EXPANSION**Fortinet**

2026-06-10

Fortinet Opens Singapore FortiNDR Cloud PoP to Boost ASEAN Threat Detection

Fortinet launched a Singapore-based FortiNDR Cloud point of presence to strengthen network detection and response across ASEAN. The new PoP brings cloud-delivered NDR closer to regional customers, improving visibility across on-premises, cloud, hybrid, and OT environments while reducing attacker dwell time and supporting regional latency and compliance needs.

CORPORATE MILESTONE**Fortinet**

2026-06-10

Fortinet Reaches 1 Million People Trained in Cybersecurity Ahead of Schedule

Fortinet announced it has trained more than one million people in cybersecurity, fulfilling a 2022 pledge ahead of its end-of-2026 goal. The milestone, delivered through the Fortinet Training Institute, reflects rising demand for practical security education, recognized credentials, and clear career pathways amid AI, cloud, and hybrid-work-driven skills gaps.

PARTNERSHIP**CrowdStrike**

2026-06-10

CrowdStrike Joins OpenID Foundation and IDPro to Advance Risk-Aware Identity Security

CrowdStrike joined the OpenID Foundation as a Sustaining Corporate Member and became a member of IDPro to accelerate an industry shift toward continuous, risk-aware identity security. The company will contribute real-time Falcon platform intelligence to open standards like the Shared Signals Framework and Continuous Access Evaluation Profile, enabling dynamic access decisions across identity providers, SaaS, and security tools as AI agents and non-human identities proliferate.

THREAT REPORT**CrowdStrike**

2026-06-10

CrowdStrike Warns China-Nexus Actors Escalating AI-Focused Attacks on U.S. Tech

CrowdStrike warned that China-nexus adversaries are escalating cyberattacks on U.S. technology firms to steal AI capabilities and intellectual property, accounting for over 58% of targeted tech intrusions in a 12-month analysis. The 2026 Technology Threat Landscape Report also flagged DPRK actors using AI-enhanced personas for IT roles and eCrime groups weaponizing AI to scale attacks and erase forensics.

PRODUCT LAUNCH**Zscaler**

2026-06-10

Zscaler Unveils ZAgent Framework to Automate Zero-Trust SASE Operations

At Zenith Live 2026, Zscaler unveiled the ZAgent Framework, an architectural layer that lets administrators automate configuration, troubleshooting, and policy work across its zero-trust SASE platform via natural-language prompts in the Experience Center. The initial Digital Experience agent diagnoses and remediates end-user issues, with planned API, CLI, and MCP extensions. Zscaler also added unmanaged-device browser security, zero-trust B2B connectivity, endpoint sandboxing, and Kubernetes microsegmentation.

2026-06-10

Zscaler Launches Zero-Trust Tools to Secure Agentic AI

Zscaler announced new innovations extending its Zero Trust Exchange to secure agentic AI, branding it the first complete zero-trust platform for AI agents. New offerings include Zscaler AI Broker for securing MCP and A2A agent communications, Endpoint AI Security to detect AI threats on devices, and an AI Access Graph mapping data and identity lineage. AI Protect enhancements add AI asset discovery, red teaming for MCP servers, prompt hardening, and multi-turn guardrails.

PARTNERSHIP**Check Point Software**

2026-06-10

Check Point Joins OpenAI's Trusted Access for Cyber Program and Daybreak Initiative

Check Point Software was approved for OpenAI's Trusted Access for Cyber program and accepted into the Daybreak cybersecurity initiative, gaining access to GPT-5.5 for high-stakes defensive security operations such as threat analysis, incident investigation, and detection engineering. Daybreak also provides Codex access and direct expert support from OpenAI's cybersecurity team, helping Check Point deliver faster, more accurate protection to its 100,000-plus customers.

Check Point Advances Secure AI Transformation for MSPs with New Platform and Unified Bundles

Check Point announced a major expansion of its MSP platform, adding a multi-tenant Management Control Plane, AI security capabilities, and unified security bundles. The new bundles combine email, endpoint, browser, mobile security, SASE, Workforce AI, awareness training, and DMARC into a single SKU aligned to Microsoft licensing to reduce tool sprawl. Workforce AI Security extends to MSPs to discover and govern AI usage, available globally to partners starting June 2026.

PRODUCT LAUNCH

Cloudflare

2026-06-10

Cloudflare Log Explorer Reaches General Availability

Cloudflare announced the general availability of Log Explorer, a native observability and forensics tool built into the Cloudflare dashboard. Running on Cloudflare's global network, it provides contextual, end-to-end visibility into user environments without external logging pipelines, helping teams investigate security and performance events directly within their existing Cloudflare deployment.

PRODUCT LAUNCH

AWS

2026-06-10

AWS Launches AWS Startup Advisor Built on 350,000 Startups' Experience

AWS launched AWS Startup Advisor, an AI tool that leverages patterns from over 350,000 startups and AWS Solutions Architect expertise to guide early technical decisions on architecture, security, and cost. Available via startups.aws with IDE integrations (Kiro, VS Code, Cursor) and a Claude Code plugin, it offers guidance on budgets, IAM, Amazon Bedrock usage, and CloudWatch for founders lacking deep cloud expertise.

AWS Graviton5-Powered EC2 M9g and M9gd Instances Now Generally Available

AWS made its Graviton5-powered EC2 M9g and M9gd instances generally available, delivering up to 25% higher compute performance than Graviton4 and targeting agentic AI workloads like real-time reasoning, code generation, and multi-step orchestration. The instances feature a 5x larger L3 cache, DDR5 memory, higher bandwidth, and the Nitro Isolation Engine for formally verified workload isolation. M9gd adds high-speed local NVMe storage.

STRATEGY**Akamai**

2026-06-10

Akamai Bets on Edge AI Inference After \$1 Billion APAC Revenue Milestone

Akamai unveiled a strategic shift to edge AI growth in Asia-Pacific after surpassing \$1 billion in regional revenue in 2025. The plan centers on deploying AI inference closer to users via GPU-powered computing on Akamai's distributed cloud, enabling real-time use cases like recommendation engines, video intelligence, and assistive agents. Akamai also plans to embed workload protection into the infrastructure, advancing toward a secure 'agentic web.'

PARTNERSHIP**Fastly**

2026-06-10

Fastly and Skyfire Partner to Enable Trusted Agentic Commerce at the Edge

Fastly and Skyfire partnered to enable trusted agentic commerce at the edge by integrating Skyfire's identity and payment-backed credentials into Fastly's programmable edge cloud. Enterprises can identify, verify, and transact with AI agents in real time using tokenized KYC and dynamic identity-based policies and pricing, distinguishing trustworthy agents from malicious automation. The solution complements Fastly's AI Bot Management and Application Security without re-architecting infrastructure.

CERTIFICATION**Akamai**

2026-06-10

Akamai Earns Microsoft Certified Software Designation for API Security

Akamai earned the Solutions Partner with certified software designation for API Security within Microsoft's AI Cloud Partner Program. The designation validates that Akamai API Security interoperates with Microsoft Azure, offering cross-platform visibility and protection for cloud-native applications and APIs across the Azure ecosystem. Akamai positioned it as extending its protection to customers' Microsoft cloud environments.

THOUGHT LEADERSHIP**Barracuda Networks**

2026-06-10

Barracuda: Why Secure Internet Access Starts at the Browser

Barracuda Networks published guidance on why secure internet access should start at the browser, emphasizing identity-aware access, continuous validation, and improved visibility through Barracuda SecureEdge. The piece frames browser-based security as foundational to cyber resilience and shows how SecureEdge integrates these controls into existing defenses to close protection gaps where work actually happens.
