Palo Alto Networks

2026-06-01

Palo Alto Networks Reinvents Security for the Agentic NVIDIA AI Factory

On June 1, Palo Alto Networks unveiled a deepened NVIDIA collaboration to secure AI Factories at scale. Cortex XSIAM integrates with the NVIDIA DOCA Argus framework on BlueField data processors for silicon-level memory analysis and kernel-level threat detection, while Prisma AIRS runs natively on BlueField for AI runtime security. The platform extends defense-in-depth across AI infrastructure, agents, applications and data, with agentless visibility via a Cortex Marketplace content pack.

Product Update

Cisco

2026-06-01

Cisco AI Defense Gets Personal with Agent Security

Cisco announced a major AI Defense upgrade that personalizes and hardens security for individual AI agents. It adds context-aware adaptive red teaming and guardrails tuned to each agent's risk profile, automated discovery of agent dependencies across code, cloud and containers, and CI/CD scanning of models, MCP servers, tools and skills. The platform-agnostic approach integrates with Amazon Bedrock AgentCore, Google ADK, LangChain and NVIDIA NeMo guardrails within Cisco Secure AI Factory deployments.

Product Launch

Check Point Software

2026-06-01

Check Point Launches Agentic Exposure Validation to Counter Frontier AI Models

Check Point launched Agentic Exposure Validation (AEV) for its Exposure Management offering, using AI agents that reason like attackers to prove what is truly exploitable. AEV correlates asset context, live exploit research, threat intelligence and protection coverage through a safe proving loop, moving CTEM programs beyond static severity scores to evidence-based exposure reduction. Early deployments uncovered novel exploits for vulnerabilities with no prior known exploit. AEV is available now within Check Point Exposure Management.

Check Point Lays Groundwork for AI Factory Security with NVIDIA

Check Point detailed its collaboration with NVIDIA to secure AI factories using Vera BlueField-4 STX and DOCA-powered innovations including DOCA Argus, DOCA Flow and DOCA Vault. Its AI Factory Firewall provides visibility, isolation, runtime protection and policy enforcement for distributed AI infrastructure, Kubernetes deployments, private LLM environments, east-west traffic and inference workloads. The partnership aims to deliver resilient architectures for enterprise AI operations.

Fortinet

2026-06-01

Fortinet Introduces FortiOS 8.0 at Accelerate 2026

At Accelerate 2026, Fortinet launched FortiOS 8.0, expanding Secure Networking with secure AI controls, fabric-based AI agents, next-generation SASE, simplified SD-WAN and quantum-safe capabilities. The release aims to reduce complexity, boost operational efficiency and deliver a scalable, unified platform supporting digital transformation and AI adoption across the network.

Product Update

Fortinet

2026-06-01

Fortinet Advances Security Operations Platform with Unified SOC and Agentic AI

Fortinet announced major Security Operations Platform updates at Accelerate 2026, centered on a unified, AI-enabled SOC built on a single Security Fabric. Agentic FortiAI expands across FortiAnalyzer, FortiSIEM, FortiSOAR and the forthcoming FortiSOC to automate triage, investigation and threat hunting. FortiEndpoint consolidates EPP, EDR, DLP and ZTNA/SASE under one agent with AI-driven control over AI application usage.

CrowdStrike

2026-06-01

CrowdStrike Named a Leader in 2026 Gartner Magic Quadrant for Endpoint Protection

CrowdStrike announced it was named a Leader in Gartner's 2026 Magic Quadrant for Endpoint Protection Platforms for the seventh consecutive year, positioned furthest for Completeness of Vision and highest for Ability to Execute

for the fourth straight time. The company highlighted its AI-native Falcon platform that executes AI on the endpoint to deliver real-time security at the point of action.

CrowdStrike Expands QuiltWorks for Frontier AI Risk

CrowdStrike expanded its QuiltWorks program to address frontier AI risk, adding major cyber insurers and brokers including Lockton, Coalition, Liberty Mutual, Resilience and Marsh. QuiltWorks blends security threat intelligence with underwriting, actuarial analysis and claims-oriented risk modeling to help boards identify, prioritize and remediate AI-related exposures, moving beyond technical defense toward coordinated remediation and financial risk protection.

Zscaler

2026-06-01

How the Zscaler Zero Trust Firewall Stops AI-Driven Attacks

Zscaler detailed how its Zero Trust Firewall defends against faster, more adaptive AI-driven attacks by disrupting the attack chain at multiple points rather than relying on a single inspection step. The approach makes assets harder to discover, conceals malicious communication and hinders lateral movement, with DNS security innovations positioned as part of the broader Zero Trust Exchange strategy.

Cloudflare

2026-06-01

Cloudflare Agents Week 2026: Building the Agentic Cloud

During Agents Week 2026, Cloudflare previewed the next edition of its Agents SDK, evolving from lightweight primitives into a full platform for AI agents that think, act and persist. The week also introduced a network performance update featuring shared compression dictionaries to speed page loads, alongside expanded agent toolbox, compute and security capabilities for the emerging agentic web.

Product Launch

Akamai

2026-06-01

Akamai Launches AI Brand Presence to Boost Visibility in Agentic Search

Akamai launched AI Brand Presence, a service that helps brands optimize content for AI search and agentic traffic by translating site content for LLMs and AI agents while monitoring bot activity and securing at the edge. In its own pilot, Akamai saw an 85% increase in citations and a 364% rise in brand presence. The service is rolling out in phases to select North American customers.

Product Update

AWS

2026-06-01

Amazon Quick Adds VPC Connectivity for MCP Connections

AWS announced that Amazon Quick now supports VPC connectivity for Model Context Protocol (MCP) connections, letting enterprises link privately hosted MCP servers on EC2, Fargate, AgentCore or other private networks without exposing them to the public internet. During connector setup, customers select the VPC connection so traffic between Quick and the private MCP server stays inside customer-controlled networks. It is available in all Regions where Amazon Quick is offered.

AWS

2026-06-01

AWS Makes Flat Network Design Default for New Data Centers

AWS detailed a shift to a quasi-random flat network design (resilient network graphs) as the default for most new data centers, moving away from traditional fat-tree topologies. Combined with Spraypoint routing and ShuffleBox interconnects, the design reportedly uses 69% fewer routers, delivers up to 33% higher throughput and cuts network power roughly 40%, improving resilience for AI-scale workloads. A first live deployment near Dublin validated performance ahead of broader rollout.

Financial Results

HPE / Juniper Networks

2026-06-01

HPE Reports Fiscal Q2 2026 Results with Juniper Integration in Focus

HPE reported fiscal Q2 2026 results with strong profitability and cash generation, driven by ahead-of-schedule Juniper Networks and Catalyst cost synergies. Networking, powered by Juniper and Mist AI, is HPE's fastest-growing segment, with attention on GreenLake AI bookings and enterprise AI adoption. Management raised fiscal 2026 guidance and introduced a fiscal 2027 growth framework, signaling confidence in integration progress.

Fastly Expands Bot Management and API Security in Q1 2026 Update

In its Q1 2026 investor supplement, Fastly highlighted security product expansions including Bot Management with Content Guard to block unauthorized AI bots and protect intellectual property, and enhanced API Security with prioritization tools, bulk actions and CI/CD integrations for API Discovery to surface shadow APIs. Fastly also launched an Agent Toolkit for AI coding agents. Security revenue grew 47% year over year to 22% of total.

Financial Results

Radware

2026-06-01

Radware Reports Q1 2026 Results with Cloud Security Momentum

Radware reported Q1 2026 revenue of \$79.8 million, up 11% year over year and a fourth straight quarter of double-digit growth. Cloud ARR rose 23% to \$98 million (39% of total ARR), with Americas revenue up 40%. The company highlighted MSSP ecosystem expansion, a new Chief Telecom (Taiwan) partnership and its subscription-based Godshield Pro managed service. Q2 revenue guidance is \$81-\$82 million.
