AWS Opens New Local Zone in Istanbul, Türkiye

AWS announced the launch of a new AWS Local Zone in Istanbul, Türkiye, extending its infrastructure closer to users in one of Europe's largest metropolitan areas. The Local Zone enables single-digit millisecond latency for latency-sensitive workloads and supports data residency requirements. It targets digital transformation across financial services, government, telecom, and healthcare, expanding AWS's edge presence for proximity-critical compute, storage, and networking.

Amazon EC2 R8i and R8i-flex Instances Now Available in AWS GovCloud (US-East)

AWS announced general availability of EC2 R8i and R8i-flex memory-optimized instances in AWS GovCloud (US-East). Powered by custom Intel Xeon 6 processors, the instances deliver up to 15% better price-performance and 2.5x more memory bandwidth versus prior Intel generations, with up to 60% faster NGINX performance and 40% faster AI deep-learning recommendation models. R8i-flex is AWS's first memory-optimized Flex family.

Amazon GuardDuty Malware Protection for AWS Backup Supports Amazon S3 Continuous Backups

AWS announced that Amazon GuardDuty Malware Protection for AWS Backup now supports Amazon S3 continuous backups. The capability enables malware scanning across the entire backup timeline with full, incremental, and on-demand scans to any restorable point in time. A new GetPITRMalwareScanResults API lets customers check malware scan status for a specific recovery point before restoring, available in all regions where the service is supported.

The Cognitive Campus Center Journey

Arista Networks published a blog detailing milestones in its Cognitive Campus Center journey: anticipating its first billion-dollar campus year in 2026, Leader recognition in the 2026 Gartner Magic Quadrant for Enterprise Wired and Wireless LAN, expansion of EOS to the industrial edge with rugged switches and a Wi-Fi 7 AP, and AVA evolving into a unified AI framework within EOS using MCP and NetDL data for AI-driven multi-domain troubleshooting.

Why Cybercrime Losses Hit \$21 Billion in 2025 — FBI IC3 Report

Barracuda published a blog analyzing the FBI IC3 2025 report, which found reported cybercrime losses reached nearly \$21 billion in 2025, up 26% from 2024. Investment fraud, business email compromise, and tech support scams were the top loss drivers, with social engineering now the primary financial impact vector. The post highlights Barracuda Managed XDR's role in detection and response.

AI Adoption Creates Critical Cloud Security Gaps - New Check Point 2026 Cloud Security Report

Check Point released its 2026 Cloud Security Report: Enter the AI Era, finding 77% of organizations have updated cloud security strategies to include AI, but only 26% have the architecture to enforce them — a 51-point intent-to-capability gap. The report highlights AI-driven changes in user behavior, application communication, and entry points, with gaps in visibility, governance, control, and real-time enforcement across the cloud stack.

Check Point Frontier AI Models Readiness Program - Jumbo Security Release

Check Point announced the Frontier AI Models Readiness Program with an accompanying Jumbo Security Release. The release delivers fixes for vulnerabilities CVE-2026-48131 through CVE-2026-48136 affecting IKE fragment reassembly, NAT-T UDP 4500 processing, NAC Captive Portal, DLP software blade interactions, and Compliance metadata. The program proactively hardens products against AI-driven threats using BLAST-identified improvements.

Check Point WAF Extends Protection to GenAI Chatbots

Check Point announced that GenAI chatbots require a dedicated protection layer to block unwanted prompts. Check Point WAF extends traditional web application and API protection into the GenAI interaction layer with prompt injection prevention, data leakage prevention, content control, and usage control. The solution operates with low latency (~50ms) and multilingual coverage across 100+ languages, securing chatbot interactions as enterprises move from experimentation to production.

Cisco Expands USGA Partnership to Showcase AI-Ready Infrastructure at Major Golf Events

Cisco expanded its USGA partnership to deploy AI-ready infrastructure at major events including the US Open and US Women's Open. The deployment combines networking, cybersecurity, Wi-Fi 7, and AI tools for crowd management, security, and real-time analytics. Cisco positions the engagement as a live, large-scale reference for AI infrastructure beyond data centers, with potential multi-venue and smart-city applications.

Cisco Nexus 9000 800G Switches Reduce AI Cluster Network Latency

Cisco announced its Nexus 9000 800G switches, designed to reduce latency and improve stability in large AI clusters dependent on frequent GPU-to-GPU communication. Key features include enhanced RoCEv2 flow optimization, dynamic congestion control, and high-density fabric for hyperscale AI environments. The platform targets ultra-low-latency backend GPU clusters for distributed AI training and inference workloads.

Cisco Unveils Full-Stack Post-Quantum Cryptography Framework at Cisco Live Amsterdam 2026

Cisco unveiled a full-stack post-quantum cryptography (PQC) framework, embedding quantum-resistant protections throughout the networking stack from secure boot to transport protocols. The Cisco C9000 Smart Switches are the first enterprise switching platform to support this quantum-resistant model by integrating PQC directly into hardware initialization. Cisco plans to expand PQC capabilities across its platforms through 2026 and beyond.

ANNOUNCEMENT**Cloudflare**

2026-05-26

Cloudflare Announces 20% Workforce Reduction to Reorganize Around AI

Cloudflare announced a 20% workforce reduction (~1,100 roles), cutting predominantly middle-management 'measurer' positions to reorganize around AI-driven operations. CEO Matthew Prince framed the move as a strategic reset for the 'agentic AI era,' not cost-cutting, with capital being redirected to 'builders' (engineers) and 'sellers.' Severance is extended through end of 2026 with healthcare and vested equity through August 15, 2026.

Cloudflare Flagship (Feature Flags) Now in Public Beta

Cloudflare announced that Flagship, its feature flag platform, is now in public beta. Flagship lets developers evaluate feature flags directly from Cloudflare Workers without outbound HTTP calls, backed by Workers KV and Durable Objects. Features include typed flag values, targeting rules, percentage rollouts, audit history, and OpenFeature-compatible SDKs, enabling globally distributed flag evaluation at the edge.

CrowdStrike Named Leader and Fast Mover in 2026 GigaOm Radar Report for Identity Threat Detection and Response

CrowdStrike announced it was named Leader and Fast Mover in the 2026 GigaOm Radar Report for ITDR. Falcon Next-Gen Identity Security received perfect 5/5 scores across Non-Human Identity Security, Risk-Adaptive Access Controls, AI-Enhanced SecOps, and Automated Incident Response. The report highlights cross-domain correlation across identity, endpoint, cloud, and SaaS, positioning Falcon as a unified, risk-aware control plane for the agentic enterprise.

Fastly Unveils DDoS Attack Insights to Strengthen Protection and Security Transparency

Fastly announced updates to Fastly DDoS Protection, introducing Attack Insights that provide real-time visibility into DDoS events. Attack Insights offer real-time validation of mitigation actions and deeper visibility for security teams, complementing Fastly's existing ability to mitigate DDoS attacks within seconds. Attack Insights are available to existing Fastly DDoS Protection customers and can be added via the Fastly control panel.

Unit 42 Reveals How Iranian Hackers Hide Behind Job Postings

Palo Alto Networks' Unit 42 published research on an Iranian APT operation linked to Screening Serpens that deployed six new RAT variants between February and April 2026 against US, Israeli, and UAE targets. The campaign used malicious job postings and spoofed recruitment sites. Newly identified malware families include MiniUpdate and Minijunk V2, leveraging DLL sideloading and AppDomainManager hijacking to evade signature-based AV.

2026-05-26

Zscaler Announces Strong Third-Quarter Fiscal 2026 Results

Zscaler reported Q3 FY2026 results for the quarter ended April 30, 2026, with 25% YoY revenue growth and raised full-year guidance. ARR guidance increased to approximately \$3.7 billion (~24% growth). The company also lifted its outlook for non-GAAP operating income and EPS, citing continued momentum in cloud security and Zero Trust adoption.

ACQUISITION**Zscaler**

2026-05-26

Zscaler to Acquire Symmetry Systems to Secure the Agentic Enterprise

Zscaler announced an agreement to acquire Symmetry Systems, adding an AI-focused access graph that maps identities, applications, and data sources interacting across the enterprise. The acquisition will integrate with Zscaler Zero Trust Exchange to enable least-privilege policies for AI agents, full data lineage, anomaly detection, and blast-radius calculations for compromised identities, supporting scalable governance of agent-to-application and agent-to-agent communications.
