FINANCIAL RESULTS

Palo Alto Networks 2026-07-01

Palo Alto Networks Posts 31% Revenue Growth, Deepens IBM & Red Hat Platform Collaboration

Palo Alto Networks reported fiscal Q3 2026 revenue of roughly \$3.0 billion, up 31% year over year, driven by Next-Generation Security ARR growth and continued platformization that consolidates network, cloud and identity into larger deals. Alongside results, the company expanded its collaboration with IBM and Red Hat to pair virtual patching with software remediation, strengthening AI-driven vulnerability response. Analysts raised price targets citing SASE and Cortex XSIAM momentum.

PRODUCT LAUNCH

Palo Alto Networks 2026-07-01

Prisma AIRS 3.0 Headlines Cyber Week 2026 AI Security Launches

At Cyber Week 2026, Palo Alto Networks introduced Prisma AIRS 3.0, an AI security platform protecting AI agents, applications, models and datasets from creation to action. The wave of launches also included Idira, a next-generation identity security platform for the AI era, Prisma Browser for Business, and Prisma SASE updates built for the agentic AI era. The releases extend the company's AI-native security push and directly overlap F5's AI Guardrails and AI Red Team positioning.

PRODUCT UPDATE**Fortinet** 2026-07-01

Fortinet Expands Daybreak Platform with AI-Powered Patch Automation

Fortinet announced an expansion of its Daybreak platform adding AI-powered patch automation, leveraging expanded OpenAI capabilities including Codex Security updates and a GPT-5.5-Cyber model for verified defenders. The company framed accelerated remediation with defensive AI as the next frontier, arguing that vulnerability discovery alone is only part of the challenge. Shares rose about 1.95% on the news.

PRODUCT ANNOUNCEMENT**Cisco** 2026-07-01

Cisco Details Embedded Network Security Strategy Against AI-Driven Threats

Cisco outlined a cohesive strategy that builds security directly into the network fabric rather than bolting it on, spanning routing, switching, wireless, cloud access and identity-aware controls. Highlights include Cisco 8000 Series Routers with built-in firewall, Cisco Multicloud Fabric for end-to-end visibility across sites and clouds, and the new Cisco Cloud Control AI-native management platform for unified orchestration. AI tools such as Cisco AI Assistant and AI Canvas aim to speed threat detection for lean IT teams.

AWARD**CrowdStrike** 2026-07-01

CrowdStrike Named Frost & Sullivan 2026 Leader in Zero Trust Browser Security

CrowdStrike was named Frost & Sullivan's 2026 Global Enabling Technology Leader in Zero Trust Browser Security, recognizing Falcon Secure Access, built on its Seraphic and SGNL acquisitions. The offering injects an engine-level JavaScript runtime security module to protect any browser—Chrome, Edge, Safari, Firefox and emerging AI browsers—across managed and unmanaged devices without routing traffic or mandating a dedicated browser. It secures access to GenAI apps and Electron tools, extending Falcon's fabric from endpoint to browser to cloud.

PARTNERSHIP**CrowdStrike** 2026-07-01

CrowdStrike and AWS Expand Falcon AI Detection and Response for AI Workloads

CrowdStrike and Amazon Web Services expanded Falcon AI Detection and Response capabilities, along with Project QuiltWorks enhancements, to secure AI workloads running on AWS. The company positioned Falcon as the central control plane for AI-era cybersecurity, deepening its enterprise AI workload coverage. Shares jumped about 12.1% following the announcement.

Zscaler Expands AI Security Suite Across Zero Trust Exchange for MSPs

Zscaler unveiled a broad expansion of AI security capabilities across its Zero Trust Exchange, targeting MSPs and MSSPs. New features include AI asset management to surface shadow AI, a Zscaler AI Broker with MCP/A2A framework and Agent Registry to govern which AI agents access resources, and an AI Access Graph via the Symmetry Systems acquisition. It also adds AI red teaming for MCP servers, a standalone prompt-hardening service, and compliance heat maps for the full AI security lifecycle.

2026-07-01

Check Point Cloud Firewall Now Available on AWS European Sovereign Cloud

Check Point announced that its Cloud Firewall offering is now available on the AWS European Sovereign Cloud, an independently operated, EU-resident AWS infrastructure. The move lets European organizations run workloads with data residency and operational autonomy while applying prevention-first security across network, workload and application layers. Check Point positioned the launch to help customers migrate sensitive workloads and meet EU regulatory requirements.

PRODUCT LAUNCH**Cloudflare**

2026-07-01

Cloudflare Announces Monetization Gateway to Charge for Any Resource via x402

Cloudflare launched the Monetization Gateway, enabling customers to charge for any resource behind Cloudflare—web pages, APIs, datasets or MCP tools—through a single control plane for payment policies and access. Payments settle in stablecoins via the open x402 protocol, peer-to-peer to the seller's wallet with sub-second settlement. Access is enforced at the edge to reduce origin load, and sign-ups are via waitlist.

PRODUCT UPDATE**Cloudflare**

2026-07-01

Cloudflare Rolls Out New AI Traffic Controls: Search, Agent and Training Crawlers

Cloudflare released three AI traffic classifications—Search, Agent and Training—letting customers on all tiers, including Free, fine-tune how AI bots access their sites. Starting September 15, 2026, new defaults will block Training and Agent crawls on ad-supported pages while keeping Search allowed, with multi-purpose crawlers following the strictest applicable rule. The update adds a Pay-Per-Crawl marketplace and BotBase, an enterprise directory of known bots and agents in the dashboard.

AWS Security Agent Expands to Mumbai, Singapore and São Paulo Regions

AWS expanded the AWS Security Agent, now part of AWS Continuum, to Asia Pacific (Mumbai), Asia Pacific (Singapore) and South America (São Paulo). The AI-powered agent secures applications across the development lifecycle with preview features including STRIDE-based threat modeling, full-repo and PR-level code reviews across GitHub, GitLab, Bitbucket and Confluence, and on-demand penetration testing. New IDE plugins and MCP integration let teams trigger reviews from Kiro or Claude Code.

AWS Artifact Adds AI-Powered Assurance Assistant for Compliance Inquiries

AWS announced that AWS Artifact now includes Assurance Assistant, an AI-powered tool that provides citation-backed answers drawn from verified AWS compliance documents such as SOC, ISO and C5. It supports vendor risk assessments and due-diligence questionnaires, handling both single on-screen questions and bulk XLSX uploads including CAIQ and SIG. The capability is available at no extra charge in all commercial AWS Regions.

Amazon GuardDuty Adds Sensitive File Modification Threat Detections

Amazon GuardDuty Runtime Monitoring added three new threat detections that alert on sensitive file modifications across EC2, EKS and ECS workloads. The findings cover persistence, privilege escalation and defense evasion by monitoring file operations such as open-for-write, rename, symlink and unlink. Detections use correlation-based analysis with MITRE ATT&CK mappings and remediation guidance to cut false positives, available to all Runtime Monitoring customers.

AWS Certificate Manager Adds ACME Support for Automated Public Certificates

AWS added ACMEv2 support to AWS Certificate Manager for public certificates, enabling automated issuance and renewal of public TLS certificates through the standard ACME protocol. Organizations can create dedicated ACME endpoints, set domain restrictions and assign External Account Binding with IAM, separating domain validation from certificate requests. It supports RSA 2048 and ECDSA P-256/P-384 keys with CloudTrail and CloudWatch integration, available across commercial regions.

BUSINESS DEAL**Akamai**

2026-07-01

Akamai Lands Record \$1.8B AI Cloud Deal, Argues AI Inference Is Swallowing the Cloud

Akamai announced a seven-year, \$1.8 billion cloud computing agreement with an AI startup, the largest customer contract in its history, underscoring momentum in distributed AI infrastructure and low-latency delivery via its AI Gateway and Firewall offerings. In a same-day blog, CTO Robert Blumofe argued that AI inference is 'swallowing the cloud,' driving demand for edge inference as centralized clouds struggle to scale real-time AI agents. Akamai also joined Claroty's alliance program to expand OT security.

SECURITY ADVISORY**Citrix (NetScaler)**

2026-07-01

Citrix Patches Six NetScaler Flaws Including New 'HTTP/2 Bomb' DoS Attack

Citrix released security updates for NetScaler ADC and NetScaler Gateway addressing six vulnerabilities, including four high-severity memory-disclosure, overflow and arbitrary file-read bugs and a new NetScaler-specific 'HTTP/2 Bomb' denial-of-service flaw discovered using OpenAI's Codex. The most scrutinized issue, CVE-2026-8451, echoes the earlier CitrixBleed flaw in how NetScaler parses SAML authentication requests. Fixes apply to versions 14.1-72.61 and 13.1-63.18, and admins are urged to patch promptly given edge exposure.
