Lumen Expands Managed Detection & Response for Palo Alto Cortex XSIAM

Lumen expanded its Lumen Defender Advanced Managed Detection and Response (AMDR) service built on Palo Alto Networks Cortex XSIAM. The offering fuses Black Lotus Labs network-level threat intelligence with XSIAM's AI-driven automation, SmartGrouping alert clustering, and agentic investigation workflows. It aims to move the first line of defense back to the network, reduce alert fatigue, and speed threat detection and response, supporting both co-managed and fully managed SOC models to help enterprises scale operations despite security skills shortages.

CORPORATE NEWS**Cisco**

2026-07-13

Cisco Files WARN Notices Cutting 471 California Jobs

Cisco moved forward with a workforce reduction affecting 471 employees across three California locations effective July 13, 2026, with WARN notices filed in June. Cuts span San Jose (236), Milpitas (154), and San Francisco (81). The reduction is part of Cisco's broader restructuring activity totaling roughly 6,370 workers nationwide across 21 WARN notices, signaling continued cost discipline as the networking giant reshapes its organization around AI and software priorities.

Dicker Data Launches Consumption-Based CrowdStrike Falcon for MSSPs

Dicker Data expanded its CrowdStrike partnership with a distributor-led MSSP aggregation model across Australia and New Zealand, letting MSPs and MSSPs offer CrowdStrike Falcon on a flexible monthly consumption basis. The program lowers entry barriers to managed cybersecurity services while letting partners retain customer relationships. It targets SMB and mid-market customers with unified, enterprise-grade protection delivered as a service, extending CrowdStrike's channel reach in the region.

Westcon-Comstor to Distribute Zscaler Zero Trust Exchange in Hong Kong and Taiwan

Zscaler announced a regional distribution partnership with Westcon-Comstor to deliver its Zero Trust Exchange platform across Hong Kong and Taiwan. The agreement extends Westcon's Zscaler distribution role beyond EMEA, ASEAN, and ANZ, enabling partners to provide cloud-native Zero Trust security for secure digital transformation, remote access, data protection, and multi-cloud connectivity. The move strengthens regional channel enablement and support for enterprises adopting Zero Trust architectures.

AWS Security Hub Adds Cross-Cloud Network Scanning

AWS introduced Network Scanning in Security Hub to detect resources reachable from the public internet, identifying exposed ports and services across both AWS and Azure. Findings integrate into Security Hub's workflow and can be enabled per account, per region, or organization-wide, with new customers getting it by default at no extra cost under Security Hub Essentials. The Azure integration expands unified, cross-cloud security posture management for enterprises operating in multi-cloud environments.

OpenAI GPT-5.6 Sol, Terra, and Luna Now Generally Available on Amazon Bedrock

AWS announced general availability of OpenAI's GPT-5.6 Sol, Terra, and Luna models on Amazon Bedrock. GPT-5.6 Sol is available in US East (N. Virginia, Ohio), while Terra and Luna add US West (Oregon). AWS positions Bedrock as a high-performance, secure inference engine offering improved intelligence and efficiency, with pricing matching OpenAI first-party rates and usage counting toward existing AWS commitments. Models are accessible via the Bedrock Console or Responses API.

PARTNERSHIP**Akamai**

2026-07-13

Akamai Named Strategic Security Partner for WWT's ARMOR AI Framework

Akamai was named a strategic security partner for World Wide Technology's AI Readiness Model for Operational Resilience (ARMOR), integrating its software intelligence and Guardicore segmentation with NVIDIA BlueField DPUs to secure AI factory environments. Akamai's role spans three pillars: offloading security to BlueField for efficient isolation and faster ransomware containment, securing AI data lakes and API access, and delivering end-to-end defense against volumetric attacks, all without sacrificing AI training and inference performance.

RESEARCH REPORT**Check Point Software**

2026-07-13

Check Point Research: AI Has Crossed from Assistant to Operator

Check Point published its AI Security Report 2026, warning that AI has shifted from assisting attackers to autonomously executing cyberattacks. Researchers documented a breach of nine Mexican government agencies where AI tools generated 5,317 commands across 34 sessions. Malicious prompt-injection payloads surged roughly fivefold between March and May 2026, and the vulnerability window has collapsed from days to hours. The report urges defenders to govern AI usage, secure AI systems, and defend at machine speed.

Lasso Releases Open-Source MCP Gateway for Securing Agentic Workflows

Lasso Security unveiled an open-source MCP Gateway, a security-focused proxy and orchestrator for the Model Context Protocol designed to secure agentic workflows in the GenAI ecosystem. The enterprise-ready gateway provides agnostic guardrails, advanced tracking, and unified visibility across MCP integrations, with real-time policy enforcement to prevent sensitive data exposure, prompt injection, and command injection/RCE. Available on GitHub, it aims to accelerate secure adoption of MCP as usage expands across enterprises.

Cloudflare Launches Precursor: One-Click Behavioral Bot Defense

Cloudflare announced general availability of Precursor, an edge-based behavioral defense for bot management that continuously analyzes browser sessions to detect automated activity in real time. It replaces static CAPTCHAs with ongoing, session-level analysis, deploying via a single script injection with no code changes. Privacy-focused, it logs aggregate behavioral patterns like timing and rhythm rather than keystrokes. Cloudflare notes automated bot traffic now exceeds human activity at roughly 57% of web requests, targeting advanced agentic bots.

AWARD

Barracuda Networks

2026-07-13

Barracuda Earns 2026 CRN Tech Innovator and MES Midmarket 100 Recognition

Barracuda Networks received dual industry recognition: Barracuda Email Protection was named a finalist in the 2026 CRN Tech Innovator Awards (Email and Web Security) for its AI-powered approach to detecting, preventing, and remediating advanced email threats, and Barracuda was named to the 2026 MES Midmarket 100. The company framed the honors as validation of its ongoing innovation helping midsize businesses strengthen cyber resilience with accessible security solutions across its partner and channel ecosystem.
