AWS Marketplace Launches Agreements API for Programmatic Procurement

AWS Marketplace introduced the Agreements API, enabling customers to procure products programmatically and manage estimates, offers, charges, entitlements, purchase orders, and agreements within existing tools and workflows. Combined with the Discovery API, it supports end-to-end procurement automation from product discovery to purchase. Partners can build custom storefronts with unified procurement experiences. Initial availability is in US East (N. Virginia); customers configure IAM permissions and call the API via the AWS SDK.

PRODUCT LAUNCH**AWS**

2026-05-06

Agent Toolkit for AWS and AWS MCP Server Reach General Availability

AWS announced the Agent Toolkit for AWS, a production-ready suite to help AI coding agents build effectively on AWS. It bundles agent skills (validated procedures for CloudFormation, data pipelines, and serverless), a fully managed MCP server with IAM guardrails, CloudWatch/CloudTrail observability, sandboxed Python execution, and Agent plugins (AWS Core, Data Analytics, Agents). Over 40 skills span IaC, storage, analytics, serverless, containers, and AI. The MCP Server is now generally available in US East (N. Virginia) and Europe (Frankfurt) at no additional charge.

AWS Brings Kiro AI Developer Tool to Singapore IHLs

AWS announced an initiative to accelerate AI software skills among Singapore Institutes of Higher Learning. Students receive 1,000 complimentary Kiro credits (20x the standard free tier) to build production-ready projects with the spec-driven AI development environment. AWS will launch the AWSome Lab portal in July 2026, pairing student-developed AI solutions with real industry challenges from SMEs and enterprises. Republic Polytechnic is already embedding Kiro via MoU. The program emphasizes spec-driven development to deliver portable, maintainable, workforce-ready software outcomes.

PARTNERSHIP**Akamai**

2026-05-06

Akamai Discloses \$200M, 4-Year NVIDIA Blackwell GPU Cluster Deal

Akamai disclosed details of a four-year, \$200 million service agreement with a major U.S. tech company to deliver a multi-thousand NVIDIA Blackwell GPU cluster on Akamai's distributed cloud for AI compute. The offering pairs an AI-optimized non-blocking, lossless Ethernet networking platform with scalable NVMe-over-Fabric storage to support AI and HPC workloads. The deal extends Akamai's AI lifecycle strategy following expansion to 41 data centers, growth of Managed Container Service, the launch of Akamai Inference Cloud, and acquisition of thousands of Blackwell GPUs.

EARNINGS**Arista Networks**

2026-05-06

Arista Reports Q1 2026 Revenue of \$2.71B, Raises 2026 AI Sales Target to \$3.5B

Arista Networks announced strong Q1 2026 results with revenue of \$2.71B (up 35.1% YoY), beating \$2.6B guidance. GAAP operating margin was 42.7% (Non-GAAP 47.8%), GAAP EPS \$0.80 (Non-GAAP \$0.87). The company raised its 2026 annual revenue target to \$11.5B and AI-related sales target to \$3.5B. Highlights include the new XPO high-density liquid-cooled pluggable optics (cutting networking racks up to 75%) and the AI Spine architecture powered by the 7800 with VOQ for AI microburst handling. Q2 guidance: ~\$2.8B revenue.

THREAT RESEARCH**Barracuda Networks**

2026-05-06

Barracuda Malware Brief: Air Gaps Breached, CPUs Hijacked, Supply-Chain Chaos

Barracuda's threat research team published a malware brief spotlighting three threats exploiting trusted enterprise pathways. APT37 Ruby Jumper (DPRK-linked) bridges air-gapped and internet-connected networks via removable media and cloud services. FAUX#ELEVATE delivers a covert Monero cryptominer through weaponized résumés, hijacking CPUs while hiding inside hiring workflows. CanisterWorm is self-propagating supply-chain malware that spreads via compromised software/hardware paths to expand blast radius. The takeaway: attackers increasingly blend into normal enterprise activities and isolation/supply-chain assumptions, requiring tighter monitoring of trusted workflows.

PRODUCT UPDATE**Cloudflare**

2026-05-06

Agents Week 2026: Agent Memory, Readiness Score, and Flagship Feature Flags

Cloudflare wrapped Agents Week 2026 highlighting an expansive set of releases for the agentic web. Announcements include Agent Memory (managed persistent memory for AI agents), an Agent Readiness score with new Radar data to help sites measure agent-friendliness, Flagship — a globally distributed sub-millisecond feature flag service built on KV and Durable Objects — shared compression dictionaries reducing model footprint by up to 22%, and AI training redirects at the edge. Internal scale stats: 20M AI gateway requests and 241B tokens processed via Workers AI.

PRODUCT UPDATE**Cloudflare**

2026-05-06

IPv6 CIDR Routes Now Supported in Cloudflare Mesh

Cloudflare added IPv6 CIDR route support to Cloudflare Mesh, enabling customers to advertise both IPv4 and IPv6 subnets through Mesh nodes. This makes IPv6-only or dual-stack private networks reachable from enrolled devices using the same dashboard or API workflow as existing IPv4 routes (e.g., entering an IPv6 CIDR like fd00::/64). The update extends private networking flexibility for organizations operating modern dual-stack infrastructures.

2026-05-06

Cloudflare Radar Adds TLD Nameserver Performance Insights

Cloudflare Radar now offers TLD nameserver performance analytics including aggregate latency percentiles (p25/p50/p75), per-nameserver p50 latency over time, median latency by data-center geography, TLD ranking deltas (1 week, 4 weeks, 3 months), and new API endpoints under /tlds/performance/. Data is measured from Cloudflare's 1.1.1.1 resolver infrastructure and is also available in Data Explorer. The feature gives DNS operators and researchers richer visibility into authoritative TLD nameserver behavior across the global Internet.

Cloudforce One Threat Events API Adds TAXII Output Format

Cloudflare announced TAXII output support for the Cloudforce One Threat Events API. Calling the endpoint with format=taxii returns standardized threat intelligence consumable by SIEM, TIP, and SOAR platforms that prefer TAXII feeds. The change automates and standardizes intelligence sharing, reducing manual integration work and ensuring consistency across security ecosystems. Customers can issue GET /accounts/{account_id}/cloudforce_one/threat_events?format=taxii to integrate Cloudflare-derived threat events into their existing security tooling.

PRODUCT LAUNCH**CrowdStrike**

2026-05-06

CrowdStrike Launches Jet Mobile App for Partner Ecosystem

CrowdStrike unveiled Jet, a new mobile app that centralizes deal origination, closure, enablement, and rewards for partners into a single real-time experience. Available on Apple App Store and Google Play, Jet enables opportunity registration in under 30 seconds, unified deal tracking, real-time notifications, and instant cash-based rewards through CrowdCard that can be loaded into Apple Wallet or Google Wallet. The app aims to streamline the partner selling motion, reduce manual workflows, and accelerate revenue generation by bringing marketplace insights and support directly to partners' mobile devices.

CrowdStrike Recognizes 2026 Americas Partners of the Year

At its Americas Partner Symposium, CrowdStrike named the 2026 Americas Partners of the Year, honoring partners that built and scaled businesses on the Falcon platform across systems integrators, cloud providers, MSSPs, and distributors. Notable winners include GuidePoint Security (Americas Partner of the Year), Accenture (Innovation Excellence), AWS (Falcon Partner of the Year), Cognizant, EY, Kroll, NVIDIA, and Zscaler. CrowdStrike emphasized that partners help customers standardize on a unified, AI-native platform to reduce complexity and stop breaches at scale.

EARNINGS**Fastly**

2026-05-06

Fastly Reports Record Q1 2026 Results, Raises FY26 Guidance

Fastly delivered record Q1 2026 results with revenue of \$173.0M, up 20% YoY. GAAP gross margin reached 62.5% (Non-GAAP 65.1%), both record highs. Security revenue jumped 47% YoY to \$38.8M, accelerating the company's pivot beyond CDN. RPO grew 63% YoY to \$369M, and large customers reached 634. Operating cash flow was \$28.9M. Management raised FY 2026 guidance to \$710–725M revenue and EPS of \$0.27–\$0.33, with Q2 EPS guidance of \$0.05–\$0.08.

PRODUCT LAUNCH**HPE / Juniper Networks**

2026-05-06

HPE Launches Self-Driving Network with Autonomous Networking Capabilities

HPE moved self-driving networks from vision to reality with new autonomous capabilities across HPE Mist and Aruba Central. The AIOps-driven solution detects, diagnoses, and resolves network issues in real time without human intervention via microservices, autonomous agents, and an agent mesh. New automated actions span performance optimization, self-securing actions, and roaming issue resolution. The UK Ministry of Justice reported a ~75% reduction in helpdesk tickets and brought ~15,000 devices in-house using the platform. Updates also extend OpenRoaming and Zero Trust capabilities for hybrid environments.

SECURITY ADVISORY**Palo Alto Networks**

2026-05-06

Critical PAN-OS Zero-Day (CVE-2026-0300) Exploited in the Wild

Palo Alto Networks disclosed a critical unauthenticated remote code execution vulnerability (CVE-2026-0300, CVSS 9.3) in the PAN-OS User-ID Authentication Portal affecting PA-Series and VM-Series firewalls. Attackers can execute arbitrary code with root privileges via crafted packets, with limited in-the-wild exploitation already observed. CISA added the flaw to its Known Exploited Vulnerabilities catalog. Patches are scheduled in two rounds beginning May 13 and May 28. Prisma Access, Cloud NGFW, and Panorama are not affected. Customers are urged to restrict portal access to trusted zones or disable it immediately.

PRODUCT UPDATE**Radware**

2026-05-06

Radware Doubles Global Cloud Security Capacity to 30 Tbps

Radware doubled its global cloud security network capacity from 15 Tbps to 30 Tbps and upgraded all cloud security centers with DefensePro X to mitigate larger, multi-vector DDoS campaigns. The enhancements deliver precise, automated protection for HTTPS floods exceeding 50 million RPS without blocking legitimate traffic. Radware's footprint now spans 65 cloud security centers worldwide, including new sites added in 2025 (Bogotá, Lima, Mumbai, Singapore, second Tel Aviv). The expansion is positioned as essential for AI-era threat volumes and improves response times and data residency compliance.

PARTNERSHIP**Zscaler**

2026-05-06

Zscaler Joins Anthropic and OpenAI Cyber Programs to Strengthen AI-Era Security

Zscaler announced participation in Anthropic's Project Glasswing and OpenAI's Trusted Access for Cyber programs to bolster AI-era cybersecurity. The company will use Anthropic's Claude Mythos Preview and Opus 4.7 for high-severity vulnerability discovery, AI red teaming, and agentic security operations, while integrating OpenAI's GPT-5.4-Cyber and Codex Security into its secure SDLC and Zero Trust Exchange. The collaboration aims to combine frontier AI models with zero-trust principles to reduce attack surfaces, accelerate vulnerability remediation, and defend against AI-powered threats.
